Climate destruction now has adversely affected all life on earth by self-serving actions of profit seekers, who promoted and, misdirected, business and public policy. Combustion of carbon containing fuels, principally Petroleum and Coal has unbalanced Earth s climate, perhaps beyond recovery. Two elements of Earths current industrialized status need to change. One is over population. Earth has the capacity to feed 2 billion sustainably, but now has 7 billion humans, that is not a long term sustainable situation it must, and will change. Corporations have developed systems burning carbon for energy. Carbon dioxide from combustion of petroleum and coal is killing life forms that sustain humans. Burning carbon is a choice, not a necessity. The cleanest lowest cost fuel on earth is hydrogen extracted from water using electricity from atmospheric wind. Hydrogen is local not requiring war or military forces to control overseas sources of petroleum. Burning hydrogen will allow earth to restore balance. If done now, earth may remain habitable for continued human activity. All technology for hydrogen use is available. Humans have all the information to control population, only attitudes must change to avoid chaos from starvation and human migrants struggling, fighting for food. President Obama s debt commission, chaired by Erskine Bowles and Alan K Simpson studying the national debt, did not find a solution to the debt..
